Commonwealth Information Security Council
WebApps
November 15, 2010
2:00 – 3:00pm
Washington Conference Room CESC

WebApps Committee members attending:
John Willinger, DBHDS

Commonwealth Security and Risk Management Staff attending:
Jon Smith, VITA

WebApps Committee members absent:
Andrew Hallberg, ABC
Doug Mack, ABC

Also attending:
None

Discussion:

Committee received a document from Michael Watson (Commonwealth Security) that provided and overview and summary of the results from the vulnerability testing conducted by Commonwealth Security.

Committee will use the document to create a supporting cover letter for the Web Application Security Guideline that will primarily consist of strongly recommending using the OWASP Top Ten as a baseline for the vulnerabilities to test Web Applications for.

Important considerations:
Who is this guideline coming from (IS Council, Commonwealth Security, etc)?
Who is the intended audience?
Do we include recommending and tools or scanning applications such as freeware?
Include the Commonwealth Security Vulnerability Scanning program

Next Meeting:
December 20, 2010
2:00 – 3:00pm
Washington Conference Room CESC
